# What is The Resident Hub?

- Powerful online tool that ophthalmology residency programs use to facilitate, measure and track ophthalmic resident education

- Resource stocked with best-in-class courses, assessment tools, resources and reports

- Simple to use right "out of the box"

- Advanced features which more ambitious program staff can use to add value for their programs

The Resident Hub™

# What is The Resident Hub?

- Most importantly, The Resident Hub IS NOT the Resident Education Center.

- The Resident Hub is completely new. And it's completely different.

# What did we learn from the Resident Education Center?

- All programs are different
  - size
  - locations
  - staffing levels
  - faculty commitment

- Program Directors have a **really** hard job and face a lot of challenges

**The Resident Hub
will make your job easier
by addressing some of the
challenges you face every day.**

# Program Director Challenge 1:

**Not enough time to develop courses for my residents**

*The Resident Hub Solution:*

- Prebuilt library of best-in-class standardized courses

- Courses cover all subspecialty areas

- Residents can use these on day one without any effort from program director. You don't have to do anything at all.

**The Resident Hub**™

# Program Director Challenge 2:

**No faculty available to teach some important topics**

*The Resident Hub Solution:*

- Prebuilt library also includes courses in areas like Optics, Pathology and Practice Management

**The Resident Hub™**

# Program Director Challenge 3:

**No time (or interest) for learning how to use a new system**

*The Resident Hub Solution:*

- If you don't have any time, you don't have to do a single thing.

- Residents can access the entire prebuilt course library on their own.

**The Resident Hub** ™

# Program Director Challenge 4:

**It's hard to benchmark my resident's level of knowledge, organize their test results and archive the data for retrieval later**

*The Resident Hub Solution:*

- Stocked with thousands of multiple choice questions that you can easily group into assessments, pre-tests and post-tests

- All results are stored in the system

- System comes with easy to use reports for individuals and groups

**The Resident Hub** ™

# Program Director Challenge 5:

**It's time consuming to give assignments to residents and I don't know if residents have done their homework or not**

*The Resident Hub Solution:*

- Email alerts remind residents when assignments are due

- Reports show resident progress and completed assignments

**The Resident Hub**™

# Program Director Challenge 6:

**Residents expect more than classroom lectures and expect online learning to be available when and where they want it**

*The Resident Hub Solution:*

- Provides a rich, robust multimedia learning experience that residents can access any time from any where

- Includes full library of content

- It also has tools for you to produce e-learning course content using your own text and images, hyperlinks, uploaded documents, YouTube videos, etc.

- You can include track-able assessments from the library or develop your own assessments

- You can group courses into robust Development/Learning Plans that can be assigned to Residents

**The Resident Hub** ™

# Program Director Challenge 7:

**I want a tool that's flexible and meets my needs, not a one-size-fits-all solution**

*The Resident Hub Solution:*

- You decide how much time you want to spend on The Resident Hub
    - No time at all: residents perform independent study using the course library
    - Minimal time: you can access reports and develop your own courses, development plans and assessments

**The Resident Hub**™

# Program Director Challenge 8:

**I just read something interesting on the ONE® Network and wish I could share it with my residents, but it's a pain to email everyone the link**

*The Resident Hub Solution:*

- You can add content from the ONE Network to your resident's catalog with the click of a button using the fully integrated Quick-Pick tool

Note: residents must be AAO members, or members of ONE Network subscribing societies (international only) to access members-only content on the ONE Network, even when that content is added via the Quick-Pick tool.

**The Resident Hub**™

# Program Director Challenge 9:

**My residents keep going to Google for help, and all they
find is a confusing mess**

*The Resident Hub Solution:*

- The course library ensures that your residents are getting
  correct, vetted information and not getting lost in unreliable
  search engine results

**The Resident Hub**™

**Sounds great, but I won't have any time to spend on this until next month
...or until after January 1
...or until after I hire the new program coordinator**

*Resident Hub Solution:*

- Your residents can start independent study in the course library right away without you doing anything

- When you have time to build and assign Development/Learning Plans to residents, The Resident Hub will

  - Recognize those Residents who already completed courses on their own
  - Give credits for courses that were completed prior to the launch of a Development/Learning Plan

**The Resident Hub™**

# The Resident Hub:
## A few words about the technology

- You can feel confident that the underlying platform is stable and established and has 24/7 reliability

- The software won e-Learning magazine's Reader's Choice Best Learning Management System for the last 3 years in a row

- Large network of users including Harvard Clinical Research Institute, McKesson, Four Seasons Hotels, Intuit, Samsung Telecommunications America, and British Airways

# The Resident Hub:
## A few words about the library of content

- Your residents **automatically** have access to a wealth of best-in-class content:
  - 40+ pre-built courses available
    - 101-Level courses covering each subspecialty area & special topics like Optics and Pathology
    - 4 Glaucoma modules from Eyemaginations
    - Courses in the 6 Basic Skills modules from JCAHPO
    - 2 beginner's coding courses and 20 practice management modules
  - EyeMovies videos (plus pre & post tests) on phaco and vitreoretinal procedures
  - Focal Points modules from the last five years
  - All accessible with just one username/password

**The Resident Hub™**

# Launch Timeline

- May 2011: Beta/Demonstrations

- May 2011-June 2011: User Acceptance Testing

- August 2011: The Resident Hub goes live

# Now what?

- If you've never subscribed, or your REC subscription runs out this summer:

  - Complete The Resident Hub order form available at www.aao.org/thehub and submit payment

- Current REC Subscribers:

  - If you have a multi-year subscription, it will roll over to The Resident Hub

  - Email spage@aao.org if you want any existing REC content migrated to The Resident Hub

**The Resident Hub**™
