

**January**

*Diabetic Macular Edema Roundtable*

DME has been the focus of several recent studies. Retina experts evaluate the practical impact of the results on the management of diabetic patients.

**CLINICAL UPDATE**

Comprehensive • Pediatric • Refractive

**February**

*Interpreting Topography for Cataract and Refractive Surgery*

Understanding preop topography is crucial, since identifying abnormalities will help avoid keratoconus or anticipate laser correction of IOL disappointments.

**CLINICAL UPDATE**

Genetics • Glaucoma • Retina

**March**

*Glaucoma Medicine Complications*

Eyedrops may sound innocent and are widely prescribed, but bradycardia, ataxia, uveitis, eyelash growth, depression and urologic symptoms are some of the unexpected results.

**CLINICAL UPDATE**

Cataract • Neuro • Retina

**April**

*Cataract Extraction and Its Variable Costs*

Many ophthalmologists are investing in ever-more-expensive phaco equipment, and premium IOLs are widely advertised. But can patients afford the cost of progress?

**CLINICAL UPDATE**

Cornea • Glaucoma • Refractive

**May**

*Managing the Retinal Dystrophies of Childhood*

Review the inherited diseases of the retina and the macula, the current and novel treatments, and the promise of gene therapies.

**CLINICAL UPDATE**

Cataract • Glaucoma • Trauma

**June**

*Happy Birthday, LASIK!*

On the 20th anniversary of the first patent issued for LASIK, a conversation with boosters and detractors of an ever-popular procedure.

**CLINICAL UPDATE**

Cataract • Glaucoma • Retina

**July/August**

*Innovation in Oculoplastics*

Cosmetic enhancement never had it so good. An update on new fillers, new botox-like agents, pulsed light and fractionated lasers.

**CLINICAL UPDATE**

Cataract • Comprehensive • Refractive

**September**

*The Ophthalmologist as Endangered Species*

Some subspecialties may soon be dwindling in numbers: neuro-ophthalmology, oncology, pediatrics, uveitis. Will there be experts left to treat our grandchildren?

**CLINICAL UPDATE**

Neuro • Oncology • Pediatrics

**October**

*Uveitis and Its Manifestations*

Review the origins, the related systemic diseases and the contemporary therapeutic approaches to uveitis, including new thinking on inflammation and viral infections.

**CLINICAL UPDATE**

Comprehensive • Cornea • Trauma

**November/December**

*Diplopia: Cornering Its Many Causes*

The patient with double vision poses lots of questions. Is there a history of strabismus or head tilt? Is it monocular? Is there a brainstem disease? Get help with current algorithms.

**CLINICAL UPDATE**

Comprehensive • Glaucoma • Retina
