

## Ranibizumab (Lucentis®) 0.1mg

### Medicare Part B Coding for Ophthalmic Use

Updated November 2016

Carriers Subject to Change – [www.aaof.org/coding](http://www.aaof.org/coding)

The following MACs do not have a policy for Lucentis®: CGS, Cahaba (Removal of [L34252](#) November 2016), Noridian, Palmetto

Medicare Carrier Part B	CPT & HCPCS Codes	Units	Diagnosis Coverage	Instructions
<p><b>First Coast Service Options</b></p> <p><a href="http://medicare.fcso.com">http://medicare.fcso.com</a></p> <p>Florida, Puerto Rico</p> <p><a href="#">L33407</a></p>	<p>67028</p> <p>J2778</p>	<p>3 or 5</p>	<p>E08.311 Diabetes mellitus due to underlying condition with unspecified diabetic retinopathy with macular edema</p> <p>E08.3211 - E08.3219 Diabetes mellitus due to underlying condition with mild nonproliferative diabetic retinopathy with macular edema, right eye - Diabetes mellitus due to underlying condition with mild nonproliferative diabetic retinopathy with macular edema, unspecified eye</p> <p>E08.3311 - E08.3319 Diabetes mellitus due to underlying condition with moderate nonproliferative diabetic retinopathy with macular edema, right eye - Diabetes mellitus due to underlying condition with moderate nonproliferative diabetic retinopathy with macular edema, unspecified eye</p>	<p><b>Documentation Requirements</b></p> <p>Documentation in the medical record maintained by the performing physician must support the following:</p> <ul style="list-style-type: none"> <li>The diagnosis of exudative senile macular degeneration has been firmly established by optical coherence tomography (OCT) or fluorescein angiography.</li> <li>Actual dose administered in milligrams.</li> </ul> <p><b>Utilization Guidelines</b></p> <p>It is expected that these services would be performed as indicated by current medical literature and/or standards of practice. When services are performed in excess of established parameters, they may be subject to review for medical necessity</p> <p>The LCD was revised to remove the dual diagnosis requirement when reporting the indication of retinal vein occlusion with macular edema. The effective date of this revision is for claims processed on or after 11/18/2016, for dates of service on or after 10/01/16.</p>

		<p>E08.3411 - E08.3419 Diabetes mellitus due to underlying condition with severe nonproliferative diabetic retinopathy with macular edema, right eye - Diabetes mellitus due to underlying condition with severe nonproliferative diabetic retinopathy with macular edema, unspecified eye</p> <p>E08.3511 - E08.3519 Diabetes mellitus due to underlying condition with proliferative diabetic retinopathy with macular edema, right eye - Diabetes mellitus due to underlying condition with proliferative diabetic retinopathy with macular edema, unspecified eye</p> <p>E09.311 Drug or chemical induced diabetes mellitus with unspecified diabetic retinopathy with macular edema</p> <p>E09.3211 - E09.3219 Drug or chemical induced diabetes mellitus with mild nonproliferative diabetic retinopathy with macular edema, right eye - Drug or chemical induced diabetes mellitus with mild nonproliferative diabetic retinopathy with macular edema, unspecified eye</p> <p>E09.3311 - E09.3319 Drug or chemical induced diabetes mellitus with moderate nonproliferative diabetic retinopathy with macular edema, right eye - Drug or chemical induced diabetes mellitus with moderate nonproliferative diabetic retinopathy with macular edema, unspecified eye</p> <p>E09.3411 - E09.3419 Drug or chemical induced diabetes mellitus with severe nonproliferative diabetic retinopathy with macular edema, right eye - Drug or chemical induced diabetes mellitus</p>	<p><b>Indications</b></p> <p>For patients with established exudative senile macular degeneration for services rendered on or after the FDA approval date of June 30, 2006. The recommended dosage and frequency of treatment is 0.5 mg/0.05mL (10mg/mL), administered by intravitreal injection once a month (approximately 28 days). Treatment may be continued monthly or reduced to one injection every three months after the first four injections, if monthly treatments are not feasible. Compared to monthly dosing, however, it is expected that quarterly dosing may be less effective, and as such, patients should be evaluated regularly.</p> <ul style="list-style-type: none"> <li>• For patients with established macular edema following retinal vein occlusion (RVO) for services rendered on or after the FDA approval date of June 22, 2010. The recommended dosage and frequency of treatment is 0.5 mg/0.05 mL (10mg/mL), administered by intravitreal injection once a month (approximately 28 days) for six months.</li> <li>• For the treatment of Diabetic Macular Edema (DME) for services rendered on or after August 10, 2012. The recommended dosage and frequency of treatment is 0.3 mg (0.5 mg) to be administered intravitreally once a month (approximately 28 days).</li> <li>• For the treatment of Diabetic Retinopathy in patients with DME for services rendered on or after February 06, 2015. The recommended dosage and frequency of treatment is 0.3 mg (0.5 mg) to be administered intravitreally once a month (approximately 28 days).</li> </ul>
