REVISION HISTORY										
CR9252: Per Palmetto remove NOC codes. FISS will do so 4/4/16.										
Per CMS do not include suffixes for subsequent & sequela. Inclusion of these codes does not follow from GEMs. Adding them is expanding coverage and is not supported clinically. CPTs addressed by 80.11 are various vitrectomies (corrective surgical treatments to eye). These procedures represent active tx of patient. By definition, S0521XD represents patient who finished active tx and receiving routine care during healing/recovery. S0521XS represents sequela, complications/conditions that arise from injury/tx, no reason to believe vitrectomy is suitable tx for sequela of injury/tx. Vitrectomy is to treat active condition itself (represented by S0521XA). Review pages 14 & 66 of "ICD-10-CM Official Guidelines for Coding and Reporting FY 2015" available at http://www.cms.gov/Medicare/Coding/ICD10/Downloads/icd10cm-guidelines-2015.pdf .										
Correction: Line 7 - Change TOB 25X to 85X due to typo.
