

Truhlsen - Marmor Museum of the Eye®  
**Legacy Project: The Second Generation**

The Legacy Project was begun in 1999 by the American Academy of Ophthalmology's Senior Ophthalmologists Committee. The project aims to find families with multiple generations of ophthalmologists and tell their stories. The Truhlsen - Marmor Museum of the Eye is proud to have the Legacy Project retained in its archives located in San Francisco.

This list contains families that have 2 generations of ophthalmologists. For the Legacy Project, a generation is defined as being of direct descent. Individuals on this list are therefore understood to be parent and child.

Dr. Frederick Blodi and his son, Dr. Christopher Blodi

We have made every effort to provide a complete and accurate listing of families. Please accept our sincere apologies if we have made a mistake or omission. Should you notice incorrect information, please contact the Museum of the Eye® and we will gladly correct our records.

Truhlsen-Marmor Museum of the Eye®
