Noridian allows coverage for CPT® Code 92227 Imaging of Retina for detection or monitoring of disease; with remote clinical staff review and report, unilateral or bilateral, for the early detection of diabetic retinopathy in patients with Type I diabetes for greater than five years or Type II diabetes at the time of diagnosis on an annual basis until such time as such retinopathy is detected. CPT® 92229 allows coverage for Imaging of retina for detection or monitoring of disease; point-of-care autonomous analysis and report, unilateral or bilateral. Once retinopathy is detected the patient should be under the direct care of an ophthalmologist but on occasion a need may arise where remote acquisition of retinal images is medically necessary. For those times 92228 or 92229 is billed.

Please note that the CPT code encompasses either unilateral or bilateral. Noridian will not pay for 92227 more frequently than annually. Medicare benefits covers an eye exam for diabetic retinopathy screening once each year if you have diabetes. 92227 or 92229 should not be billed if the patient has had an in person ocular examination by an ophthalmologist.

In a patient with established diabetic retinopathy, a remote image process may be done and the images transmitted to an ophthalmologist for review and guidance. The image review must be done by an ophthalmologist. For imaging of retina for detection or monitoring of disease; with remote physician or other qualified health care professional, interpretation and report, unilateral or bilateral (92228), an ophthalmologist must interpret the image and submit a

formal report with any treatment or follow up recommendations. In the rare instance where an ophthalmologist is not available in a patient with established diabetic retinopathy, point of care follow up images may be done using 92229 with automated analysis and report.

The imaging device must be FDA approved for the intended use. In addition, transmission of the images and beneficiary information must adhere to applicable HIPAA laws for patient privacy.

The originating office must be able to demonstrate that the person acquiring the image(s) has been fully trained in the acquisition of such images for the respective device.

In review, once diabetic retinopathy is diagnosed the use of CPT® 92227 no longer applies as the care is no longer screening in nature.

Bill Type Codes

Contractors may specify Bill Types to help providers identify those Bill Types typically used to report this service. Absence of a Bill Type does not guarantee that the article does not apply to that Bill Type. Complete absence of all Bill Types indicates that coverage is not influenced by Bill Type and the article should be assumed to apply equally to all claims.
