

Smart.
Simple.
Safe.
Flexible.

The best surgical site marking solutions work the way you do. So whether your facility distinguishes the surgical eye by using YES and the surgeon's initials, or a system of YES and NO for the non surgical eye, OP-marks delivers a cost effective, highly visible solution that helps you stay compliant while ensuring patient safety.

Contact OP-marks for additional information and customization requests.

Letters

Well Wishes

In the July issue, Dr. Mills' monthly Opinion column addressed his most recent battle with leukemia. Many members sent e-mails and letters of support and encouragement—here are two examples.

I recently read about your harrowing near-death experience in "A Personal Medical Saga: Almost a Zombie?" and appreciate you sharing this with your readers. I will immediately stop complaining to my wife about my sprained metatarsal and some of the other minor maladies an aging baby boomer encounters on a daily basis.

Thanks for your candor and humor about your recent brush with mortality. I hope you will continue to make a quick recovery and return to better health. Be sure to enjoy your "stop-page" time.

Neal A. Sher MD, FACS
Minneapolis

Wow! What a story. I am so glad that you are around to tell it in your own inimitable and wonderful

Past issues are available online at www.eyenet.org/archives.

way. I was unaware that you were having a problem with leukemia. Let's hope that the chemo killed every last one of those nasty white cells. So glad that you survived and that you survived intact.

I wish you the best going forward, and I am looking forward to seeing you at the Annual Meeting in New Orleans.

George H. Garcia, MD
Orange, Calif.
