

Objectives, Pre and Post-Test Questions for a Learning Curve Educational Activity

OBJECTIVES

After completing this educational activity in the Learning Curve, you should be able to:

- Restate two questions an ophthalmologist should ask him or herself before learning a new procedure.
- Describe when and how an ophthalmologist should disclose his or her experience in a particular technique to a patient.
- Identify three methods by which learning a new technique post-residency can be accomplished.

PRE AND POST TEST QUESTIONS

1. Which of the following is the least applicable rule of the AAO Rule of Ethics for the learning curve?

- A. Rule 2: Informed Consent
- B. Rule 9. Medical and Surgical Procedures
- C. Rule 11. Commercial Relationships
- D. Rule 15. Conflict of Interest

2. Components of competency include:

- A. Patient selection
- B. Pre-operative evaluation and preparation
- C. Familiarity with instrumentation
- D. Surgical skills/judgment
- E. All of the above

3. Which method of learning a new technique post-residency is not acceptable in and of itself?

- A. Scientific meeting wet labs.
- B. Studying relevant literature.
- C. Weekend course taught by recognized expert.
- D. Shadow an experienced colleague, then have the colleague mentor you.
