

Measure 192: Cataracts: Complications within 30 Days Following Cataract Surgery Requiring Additional Surgical Procedures

Reporting Options: Registry, EHR, Cataracts Measures Group

Quality Domain: Patient Safety

Description: Percentage of patients aged 18 years and older with a diagnosis of uncomplicated cataract who had cataract surgery and had any of a specified list of surgical procedures in the 30 days following cataract surgery which would indicate the occurrence of any of the following major complications; retained nuclear fragments, endophthalmitis, dislocated or wrong power IOL, retinal detachment, or wound dehiscence.

Instructions: This measure is to be calculated each time a procedure for non-complicated cataracts is performed during the reporting period. This measure is intended to reflect the quality of services provided for the patients receiving uncomplicated cataract surgery.

Note: Clinicians who indicate modifier -55, postoperative management only OR modifier -56, preoperative management only, will not qualify for this measure.

CPT Codes: 66840, 66850, 66852, 66920, 66930, 66940, 66982, 66983, 66984 and patients without comorbid conditions that impact the visual outcome of surgery.

Patients with documentation of one or more of the following comorbid conditions prior to date of cataract surgery are excluded from the measure calculation (Patients with documentation of the presence of one or more of the following significant ocular conditions that impact the surgical complication rate prior to date of cataract surgery which is still active at the time of the cataract surgery are excluded from the measure calculation.):
