New Prior Authorization Requirements for Blepharoplasty and Botox in HOPDs

Effective July 1, 2020, there are new rules for hospital outpatient departments (HOPDs): Before clinicians perform eyelid surgery or inject Botox (botulinum toxin), the HOPD must 1) request a prior authorization and 2) receive a provisional affirmation decision.

Using an ASC? The new rules don’t impact ambulatory surgery centers.

Why the new requirement? The Centers for Medicare & Medicaid Services (CMS) has seen an increase in HOPD surgeries that, depending on the circumstances, can qualify as either functional or cosmetic. By making prior authorization compulsory, the agency hopes to avert incorrect payments when the purpose of the surgery is cosmetic and assure that patients are covered when the purpose is functional.

Prior Authorization in Action
The HOPD and your practice collaborate in filling out the paperwork and supplying the documentation, and then the HOPD sends the request to its Medicare Administrative Contractor (MAC).

What should the request include?
Include what’s listed on the prior authorization checklist (see “More Online”), plus supporting documentation that meets the MAC’s requirements.

A turnaround of up to 10 days. MACs should make a decision and send their response within 10 business days. How the HOPD submits the request (e.g., by mail, fax, or online) is likely to determine how the MAC sends its response. The MAC also notifies the patient about its decision.

What about emergencies? If an HOPD asks for a request to be expedited, the MAC will respond within two business days. However, the request must document how a delay could severely impact life, health, or limb.

No UTN, no payment! The UTN is the unique tracking number that a MAC assigns to a request for prior authorization; look for it in the MAC’s response. Next, when you submit your claim, make sure you include the UTN in the correct places (e.g., in positions 1-18 for electronic claims).

What about ABNs? Advance Beneficiary Notice (ABN) policies are unchanged and should still be followed.

What about audits? While audits of records may still happen, if you received a provisional affirmation for a service, the claim for that service is unlikely to be included in a review.

Eventually, some HOPDs may be exempt from prior authorization. CMS is authorized to allow exemptions from Medicare’s requirements. What is consistent compliance? CMS materials state that an HOPD must submit at least 10 requests and at least 90% of those must get a provisional affirmation. The agency doesn’t expect to start approving any exemptions until 2021.

Eyelid Surgery
HOPDs must obtain prior authorization for the following CPT codes.

Blepharoplasty:
- 15820 lower eyelid
- 15821 lower eyelid, with extensive herniated fat pad
- 15822 upper eyelid
- 15823 upper eyelid, with excessive skin weighting down lid

Repair of brow ptosis:
- 67900 supraciliary, mid-forehead or coronal approach

Repair of blepharoptosis:
- 67901 frontalis muscle technique with suture or other material (e.g., banked fascia)
- 67902 frontalis muscle technique with autologous fascial sling (includes obtaining fascia)
- 67903 (tarso) levator resection or advancement, internal approach
- 67904 (tarso) levator resection or advancement, external approach
- 67906 superior rectus technique with fascial sling (includes obtaining fascia)
- 67908 conjunctivo-tarso-Muller’s muscle-levator resection (e.g., Fasanella-Servat type or MMCR)

Correction:
- 67911 Correction of lid retraction

MORE ONLINE. For a list of Botox codes and prior authorization checklists, see this article at aao.org/eyenet.
Botox Injection

HOPDs require prior authorization for the following CPT and HCPCS codes.

Chemodenervation of muscle(s):
- 64612 muscle(s) innervated by facial nerve (e.g., for blepharospasm, hemifacial spasm)
- 64615 muscle(s) innervated by facial, trigeminal, cervical spinal and accessory nerves, bilateral (e.g., for chronic migraine)

HCPCS codes for the injected medication:
- J0585 onabotulinumtoxina, 1 unit
- J0586 abobotulinumtoxina
- J0587 rimabotulinumtoxinb, 100 units
- J0588 incobotulinumtoxina, 1 unit

Prior Authorization Checklist for Eyelid Surgery

The HOPD and practice must collaborate in completing a cover-sheet provided by the MAC. It may include requests for some or all of the following information.

- Beneficiary’s name
- Medicare Beneficiary Identifier (MBI)
- Date of birth
- Facility information, including
  - Name
  - Address
  - National Provider Identifier (NPI)
  - Provider Transaction Access Number/CMS Certification Number (PTAN/CCN)
- Physician information, including
  - Name
  - Address
  - NPI
  - PTAN
- Requester’s information, including
  - Name
  - Telephone number
  - Address
- Anticipated date of service
- CPT surgical codes
- ICD-10 diagnosis codes appropriate for procedure, including laterality when appropriate
- Type of bill (use a four-character alphanumeric code to indicate the type of facility, type of care, and sequence of this bill in this episode of care)
- Units of service
- Type of request
  - Indication whether this is an initial or resubmission review
  - Indication if review is to be expedited and reason

Note: In addition to the information above, the MAC will also want documentation that supports the request. What documentation is required for eyelid surgery? This varies among Medicare payers. Visit aao.org/lcds for your MAC’s preoperative documentation requirements.
