FOCAL POINTS®

Member Benefit Information
and Cumulative Index

January 2021

Dear *Focal Points* Reader:

Each issue of *Focal Points* reviews the most crucial advances in ophthalmology and features insights to help you integrate tested findings into your practice. While *Focal Points* ceased publication of new modules in December 2020, as of January 2021, the *Focal Points* digital archive of 120+ modules is available to you as a free Academy member benefit. Recent topics have included OCT for the management of glaucoma, dry eye disease, and retinal vein occlusions, and you will find numerous modules valuable to practitioners in all subspecialties.

For 2020 print subscribers, a 2020 binder-spine insert is provided here, as is a 2020 table of contents. An updated cumulative index is also included for your reference. Use the digital index to quickly search module titles by subspecialty, key words, and author names.

The 2019 and 2020 modules include audio files so that you can listen to the modules on your smartphone, tablet, or computer. To listen to a module, click the audio link under the Learning Objectives. Many modules also include videos that can be accessed via links within the text.

Focal Points is a great way to earn CME credits—two credits per issue. Reviewing and claiming CME credit online is easy; just click the CME Central link at the end of the module or go to aao.org/cme. You will need your Academy username and password to log into CME Central. *Focal Points* CME credits must be claimed on a per-issue basis.

We hope that you find the digital archive to be a valuable resource.

Sincerely,

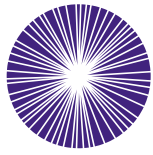

The *Focal Points* team
