## WHAT'S HAPPENING

### The Next Generation of Physician Advocates

During the Mid-Year Forum 2016, Academy Secretary for State Affairs Kurt F. Heitman, MD, gave the Platinum Participation Award to the Illinois Society of Eye Physicians and Surgeons (ISEPS) and the Ohio Ophthalmological Society (OOS) for their outstanding support of the Academy's Advocacy Ambassador Program. The Advocacy Ambassador Program is a collaborative effort between the Academy and state, subspecialty, and specialized interest societies and training programs to sponsor members in training to attend the Mid-Year Forum.

**New advocates in D.C.** As Advocacy Ambassadors, 164 members in training joined seasoned Academy and society leaders in visiting legislators on Capitol Hill during Congressional Advocacy Day. They also participated in L.E.A.P. Forward, a session created especially for them where they networked with Academy and society leadership while discussing the 4 L.E.A.P. modules: leadership, engagement, advocacy, and practice management. Ambassadors attended a debrief session where they shared experiences on the Hill, asked questions of Academy and society advocacy physician leaders and staff, and

were educated on the importance of their involvement at the state level.

**Illinois residents put lessons learned into action.** Twelve residents from various training programs in Illinois participated as Advocacy Ambassadors sponsored by ISEPS at the Mid-Year Forum 2016. They are putting the pearls they learned into action as they participate in an ongoing legislative battle in Illinois. Chris Albanis, MD, ISEPS Past President and Academy Associate Secretary for State Affairs, said, "It has been critical for ISEPS to engage the future generation in our efforts to maintain quality eye care for our patients. Our state legislators need to hear from these residents who can beautifully articulate the level and length of training they undergo in order to protect sight for the patients of Illinois."

## TAKE NOTICE

### U.S. Senior Surgical Retina Fellows: Apply for Award

The Ronald G. Michels Fellowship Foundation is accepting applications for its annual cash award to support second-year vitreoretinal fellows—the application deadline is July 15. The awards are given to outstanding vitreoretinal fellows (not their sponsoring institutions).

The Michels Foundation was established in 1991 to honor the many talents of Ron Michels, MD, and to provide funds to young scholars so that they may follow in his footsteps. Dr. Michels distinguished himself through his important contributions to the peer-reviewed literature, his passion for

training vitreoretinal fellows, and his dedication to providing cutting-edge patient care. On its website, read about the state of the Michels Foundation as it celebrates its 25th anniversary.

To apply, visit [www.michelsfoundation.org/appformuploads.html](http://www.michelsfoundation.org/appformuploads.html).

For more information on the Michels Foundation, visit [www.michelsfoundation.org](http://www.michelsfoundation.org).

### PQRS: Aug. 1 Deadline for Cataracts Measures Group

If you do not have electronic health records (EHR), what's the least burdensome way to participate in the Physician Quality Reporting System (PQRS)?

If you perform cataract surgery, you can report the Cataracts Measures Group by manually entering data into the IRIS Registry Web portal. You'll need to report 8 predetermined measures for at least 20 patients (at least 11 must be Medicare Part B).

However, you must meet the following deadlines:

- By Aug. 1, submit your signed IRIS Registry agreements.
- By Sept. 30, provide preoperative surveys and perform cataract surgery on at least 20 patients who meet the reporting criteria.
- By Jan. 15, 2017, provide patients with postop surveys, submit all Cataracts Measures Group reporting data in the IRIS Registry Web portal, and submit your signed consent allowing the IRIS Registry to send data to the Centers for Medicare & Medicaid Services.

If you don't perform cataract surgery, you can use either the new Diabetic Retinopathy Measures Group or individual measures to report PQRS manually via the IRIS Registry Web portal, but you must sign up by Oct. 31.

If you do have EHR, the deadline for signing up to integrate your system with the IRIS Registry in 2016 has already passed; if you met that deadline, you must get your system mapped to the IRIS Registry by Aug. 1.

For more information, visit [www.aao.org/irisregistry](http://www.aao.org/irisregistry).

### Updated HIPAA Advisory Opinion

During its April 2016 meeting, the

Academy Board of Trustees approved a newly revised ethics Advisory Opinion. *Release and Confidentiality of Patient Records* was updated to reflect current federal regulations regarding the Health Insurance Portability and Accountability Act (HIPAA). The goal of the revision is to ensure that Academy members have the most up-to-date information available for comprehensive understanding of the complexities of HIPAA compliance.

### D.C. REPORT

## The Academy Focuses on Congress

Although presidential politics dominate the media, the Academy is concentrating on Congress, working to reelect ophthalmology's champions already serving at a federal level, along with selecting new candidates who understand ophthalmology's issues. Luckily, in many cases those who are running are physicians.

**The importance of congressional relationships.** The Academy is an active participant in the legislative process because it develops and maintains strong relationships with those who can make a tangible impact in the House of Representatives or the Senate. Having an advocate who serves on the right congressional committee or holds the right leadership position in the House or Senate can make or break efforts to move or derail important legislation, and can enable the Academy to put pressure on federal regulators through the oversight that Congress holds over many agencies. Considering the full plate of issues ophthalmology is working with (Medicare fee cuts, compounding, and the meaningful use of electronic health records, to name a few), having friends in high places is critical.

**Looking forward.** In November 2016, the Academy will be paying particular attention to the outcomes of races in Arizona, Florida, Kansas, Louisiana, Maryland, Michigan, Minnesota, and Nevada. In some of these states, physicians are seeking to gain a seat in the House or Senate. In some, candidates like ophthalmologist Sen. Rand Paul, MD (R-Ky.), are facing tough reelections. In others, allies who have supported ophthalmology for years are retiring or moving on to different positions. And for each of the House seats that is up for grabs, it's important that we know who the Academy's supporters are and how to gain new friends.

### What You Can Do

**Invest in OphthPAC.** Since 1985, OphthPAC has helped keep friends in Congress close, amplifying ophthalmology's voice in Washington, D.C. When Congress' new class of lawmakers take office in 2017, your OphthPAC dollars will help Academy lobbyists greet them with a powerful handshake from our profession.

**Familiarize yourself with congressional candidates.** It's important to know what's going on below the presidential fray—that's where the foundation of ophthalmology's advocacy success will be built.
