

Standard photograph 2A, the standard for hemorrhages/microaneurysms. Eyes with severe NPDR have this degree of severity of hemorrhages and microaneurysms in all four midperipheral quadrants.

Standard photograph 6A, less severe of two standards for venous beading. Two main branches of the superior temporal vein show beading that is definite but not severe.

Standard photograph 8A, the standard for moderate IRMA. Patients with severe NPDR have moderate IRMA of at least this severity in at least one quadrant.
