Coverage Guidance

Coverage Indications, Limitations, and/or Medical Necessity

Abstract:

Visual field testing detects defects in the field of vision, testing the function of the retina, optic nerve and optic pathways. Formal visual field tests are generally performed using automated perimetry, i.e., measurement of the ability to see points of light at varying locations on a curved surface.

Indications:

Visual field examinations are considered medically necessary for the conditions listed below:

- 1. The patient has a disorder of the eyelid(s) potentially affecting the visual field(s).
- 2. The patient has a visual field defect detected on gross visual field testing (e.g., confrontational testing).
- 3. The patient has a documented diagnosis of glaucoma. It should be noted that the progression of, and effects of treatment on glaucoma can be monitored only through periodic visual field testing. The frequency of such examinations is dependent on changes in intraocular pressure (IOP), retinal damage and changes at the optic disc.
- 4. The patient is suspected of having glaucoma; signs include increased intraocular pressure, asymmetric IOP measurements, notching or thinning of the neuroretinal rim, splinter hemorrhages and asymmetric appearance of the discs.
- 5. The patient has a documented disorder of the optic nerve, the retina or the neurologic visual pathway.
- 6. The patient has a recent intracranial hemorrhage, an intracranial mass or a recent increased intracranial pressure measurement (with or without visual symptoms).
- 7. The patient has a recent occlusion / stenosis of cerebral or precerebral arteries.
- 8. The patient has a history of a cerebral aneurysm, pituitary or occipital tumor potentially affecting the visual fields.
- 9. The patient is being evaluated for buphthalmos, congenital anomalies of the posterior segment or congenital ptosis.
- 10. The patient has a disorder of the orbit potentially affecting the visual field.
- 11. The patient has sustained a significant eye injury.
- 12. The patient has unexplained visual loss.
- 13. The patient has a pale or swollen optic nerve on a recent examination.
- 14. The patient is having new functional limitations which may be due to visual field loss (e.g., reports by family of patient bumping into objects). (change to e.g.,)
- 15. The patient is taking a medication with a high risk of affecting the visual system (e.g., Plaquenil).
- 16. The patient is being evaluated for macular degeneration, or has experienced central vision loss (< 20/70). (Repeated examinations for diagnosis of macular degeneration or central vision loss are not medically necessary unless changes in vision are documented, or to evaluate the results of a surgical intervention).

Limitations:

Gross visual field testing (e.g., confrontation testing) is a part of general ophthalmological service and should not be reported separately.

Coding Information

Bill Type Codes:

Contractors may specify Bill Types to help providers identify those Bill Types typically used to report this service. Absence of a Bill Type does not guarantee that the policy does not apply to that Bill Type. Complete absence of all Bill Types indicates that coverage is not influenced by Bill Type and the policy should be assumed to apply equally to all claims.

Revenue Codes:

Contractors may specify Revenue Codes to help providers identify those Revenue Codes typically used to report this service. In most instances Revenue Codes are purely advisory. Unless specified in the policy, services reported under other Revenue Codes are equally subject to this coverage determination. Complete absence of all Revenue Codes indicates that coverage is not influenced by Revenue Code and the policy should be assumed to apply equally to all Revenue Codes.

Revenue codes only apply to providers who bill these services to the Part A MAC. Revenue codes do not apply to physicians, other professionals and suppliers who bill these services to the Part B MAC.

Please note that not all revenue codes apply to every type of bill code. Providers are encouraged to refer to the FISS revenue code file for allowable bill types. Similarly, not all revenue codes apply to each CPT/HCPCS code. Providers are encouraged to refer to the FISS HCPCS file for allowable revenue codes.

All revenue codes billed on the inpatient claim for the dates of service in question may be subject to review.

Revision History Information

Please note: Most Revision History entries effective on or before 01/24/2013 display with a Revision History Number of "R1" at the bottom of this table. However, there may be LCDs where these entries will display as a separate and distinct row.

Revision History Date	Revision History Number	Revision History Explanation	Rea	ason(s) for Change
01/01/2016	R4	Added ICD-10-CM diagnosis code H53.40 to the ICD-10-CM codes that support medical necessity section, effective for services rendered on or after 10/01/2015.	•	Request for Coverage by a Practitioner (Part B)
01/01/2016	R3	Based on 2016 HCPS updates, the description was changed for CPT code 92083.	•	Revisions Due To CPT/HCPCS Code Changes
10/01/2015	R2	Bill type codes added	•	Provider Education/Guidance
10/01/2015	R1	Added ICD-10-CM diagnosis code range to the ICD-10 -CM diagnosis codes that support medical necessity section: S04.011A through S04.12XS.	•	Provider Education/Guidance
